

Aachal Suresh Yadav

Python Developer | Data Analyst | Business Analyst

Pune, India · yaachal2710@gmail.com · linkedin.com/in/aachal-yadav-85347028a · github.com/aachalyadav

Professional Summary

Results-oriented B.Tech student in AI & Data Science with proven experience building **end-to-end analytics pipelines**, **AI-integrated applications**, and **Power BI dashboards**. Completed **Deloitte Data Analytics Job Simulation** (Data Analysis & Forensic Technology, Jun 2026). Proficient in **SQL, Python, EDA, Data Cleaning, KPI Reporting, Statistical Analysis, Trend Analysis**, and **Business Intelligence**. Cleared institutional round for **Smart India Hackathon (SIH)**. Seeking Data Analyst / Business Analyst / Python Developer roles where data-driven thinking creates measurable business impact.

Education

Pimpri Chinchwad University (PCU) — PCET

2022 – 2026

Bachelor of Technology, Computer Science (AI & Data Science)

Aggregate: 75%+

Final Year | Currently Enrolled

Technical Skills

Languages	Python, SQL, HTML, CSS, JavaScript
Analytics & ML	Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, EDA, Data Cleaning, Statistical Analysis, Trend Analysis, Forecasting, Root Cause Analysis
BI & Visualization	Power BI (DAX, KPI Dashboards), Tableau, Microsoft Excel (Pivot Tables, VLOOKUP, Charts)
Frameworks & Tools	Django, FastAPI, REST APIs, Pydantic, Git, GitHub, Jupyter Notebook
Cloud & Infra	AWS Cloud Foundations, Oracle OCI, Red Hat OpenShift
Soft Skills	Data Storytelling, Business Communication, Stakeholder Reporting, Problem Solving

Projects

E-Commerce Sales Intelligence System

2026

Excel, SQL, Python, Power BI, Matplotlib, Seaborn

- Improved profitability recommendations by **15–20%**, as measured by identified revenue leakage across **3 loss-making regions**, by building a SQL + Python **ETL pipeline** on **50,000+ records** and a Power BI dashboard tracking revenue, margin, and retention KPIs.
- Applied **linear regression (Scikit-learn)** for sales forecasting — model achieved **~80% directional accuracy** on holdout data, enabling proactive inventory planning 4 weeks ahead.

Retail Sales Analytics Dashboard — Python EDA & Trend Analysis

2025

Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook

- Reduced data inconsistency by **35%**, as measured by null/duplicate record count before and after cleaning, by applying Pandas-based EDA on **50,000+ retail transactions** and resolving missing values, dtype errors, and duplicates.
- Built **12 business visualisations** (seasonal trend lines, heatmaps, category charts) surfacing top-5 revenue SKUs and peak demand windows; delivered BI-format analytical report with pricing and inventory recommendations.

Achievements & Activities

- Smart India Hackathon (SIH) 2024** — Cleared institutional internal selection round; project shortlisted among top college teams for national-level screening.
- GirlScript Summer of Code (GSSoC)** — Open source contributor, Python & Web Development repositories.
- Techno Project Exhibition** — Presented technical project at college-level innovation exhibition.

Certifications

- Data Analytics Job Simulation** — Deloitte (via Forage) | Data Analysis & Forensic Technology Jun 2026
- Oracle OCI 2023 AI Certified Foundations Associate** — Oracle Valid until Sep 2026
- AWS Academy Cloud Foundations** — Amazon Web Services
- Introduction to OpenShift Applications (DO101)** — Red Hat Academy
